

SA'ED HAJJIH

Amman, Jordan | +962796494569 | s.m.hajeh@gmail.com | [linkedin](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Junior Electrical Design Engineer with one year of experience in engineering consultancy, working on the design and preparation of electrical layouts and participating in technical coordination using AutoCAD, Revit, and Navisworks. Assisted in developing lighting designs using DIALux evo, as well as performing basic power system and energy analysis tasks using ETAP and HOMER Pro. Contributed to the production of accurate, well-coordinated technical drawings in line with project requirements and construction standards, while continuously developing technical and design skills. I am highly motivated and deeply invested in mastering advanced low-current systems, smart infrastructure, and modern engineering technologies.

WORK EXPERIENCE

Electrical Design Engineer | Consultancies House for Ultimate Management (CHUM)

Sep 2025 – Present

- **Electrical & Low-Current Design:** Developed detailed 2D/3D electrical layouts, shop drawings, single-line diagrams, and optimized cable routing using AutoCAD and Revit, ensuring seamless technical coordination across systems.
- **Lighting & Engineering Analysis:** Performed advanced photometric calculations using DIALux evo and conducted power system and renewable energy simulations in ETAP and HOMER Pro to maximize system performance and energy efficiency.
- **Technical Documentation & Specifications:** Prepared comprehensive Bills of Materials (BOM) and detailed technical specifications for both power distribution and integrated low-current systems.

EDUCATION

Bachelor's degree in electrical Power Engineering

Jun 2025

Al-Balqa Applied University – Amman, Jordan

MEMBERSHIPS & AFFILIATIONS

Member, Jordan Engineers Association (JEA), Electrical Power Engineering

LICENSES & CERTIFICATIONS

- Licensed Electrical Engineer | Jordan Engineers Association Aug 2025
- Ultimate Electrical Design Course from Zero to Hero – Udemy 2025

Tools & Skills

- **Software:** AutoCAD, Revit, Navisworks, DIALux evo, ETAP, HOMER Pro, PV SYST, Microsoft Excel
- **Technical Skills:** Electrical Layouts, Cable Routing, Voltage drop & Short Circuit Analysis, Power System Simulations, Technical Documentation, Bill of Materials (BOM) Preparation, Loads Scheduling
- **Codes & Standards:** NFPA (Life Safety), Saudi Building Code, CIBSE Guidelines, Jordanian National Codes
